

ALEXANDRA DOMARESKI

Frontend Developer with a Design Background | React | TypeScript

Arnhem, Netherlands | +31 6 48365268 | aleexandra.junges@gmail.com | [LinkedIn](#) | [Github](#)

SUMMARY

Frontend Developer with a 6-year graphic design background, specialising in React, TypeScript, and TailwindCSS. I build interfaces that come out of development looking like the mockup, because I understand both sides of the handoff. Currently building production UI components at Hundred Miles, open to frontend roles in the Netherlands.

SKILLS

- **Technical:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Node.js, Express.js, SQL, MongoDB, REST APIs, Git/GitHub, Azure DevOps (CI/CD Pipelines), Responsive Design, Unit Testing (Jest/Vitest).
- **Design:** UI/UX Design (Figma), Wireframing, Typography, Color Theory.
- **Soft Skills:** Problem-Solving, Cross-functional Collaboration, User-Centric Thinking.
- **Languages:** Portuguese (Native), English (Fluent), Dutch(Basic).

TECHNICAL PROJECTS

Recipe Manager | TypeScript, React.js, Tailwind CSS, Prisma, Node.js, Azure DevOps

- Developed a full-stack recipe system with JWT authentication and a CI/CD pipeline using Azure Pipelines, automating builds and Jest unit testing on every push to main
- Optimised data handling with Prisma ORM, reducing query complexity and enforcing end-to-end type safety between database and API layers

Kalmio (Booking App) | JavaScript, React.js, Tailwind CSS, MongoDB, Node.js

- Engineered a full-stack booking platform featuring a synchronized scheduling interface and secure admin dashboard, enabling real-time management of service listings and therapist profiles
- Designed and built a pixel-perfect responsive UI with Tailwind CSS, translating Figma mockups directly into production-ready components with a focus on accessibility and conversion-optimized user flows

Wizards Shop (E-commerce) | React.js, State Management, Styled Components

- Built a themed e-commerce app in React.js with a multi-category product catalog, implementing real-time filtering and search that reduced navigation friction across the full product range
- Implemented a custom shopping cart system using React hooks and state management, allowing users to seamlessly add, remove, and manage item quantities with persistent data

EDUCATION

- [React Developer Certification](#), Global Tech Council | Issued April 2026
- [Web Development Bootcamp](#), Ironhack | Nov 2025 - Feb 2026
- **B.S. in Graphic Design**, Faculdades Energia - FEAN | Jan 2016 - Dec 2019
- **Internet Programmer**, SENAI CTAI | Jan 2013 - Dec 2014

WORK EXPERIENCE

Software Engineer | Neat Software B.V. | Jun 2026 - Present

- Refactoring, redesigning, and building new features for MineralTrade, a Next.js advertising platform for the mining industry, improving UI consistency and user experience ahead of a client trade fair deadline
- Collaborating with the engineering lead through structured code reviews on GitHub, maintaining code quality and consistency across the codebase

Frontend Engineer | Hundred Miles | Mar 2026 - Jun 2026

- Built a library of reusable UI components in React and TypeScript, establishing a consistent component library that reduced duplication across the codebase for a small cross-functional team
- Shipped responsive components in a cross-functional Agile team, integrating RESTful APIs within tight sprint deadlines

Graphic Designer & Digital Production | Freelance/Various | Nov 2017 - Apr 2024

- Delivered 50+ digital and print projects across law, insurance, finance, and healthcare clients, managing conflicting deadlines and distinct brand books with zero deviation
- Acted as the primary bridge between clients and development teams, translating vague briefs into detailed wireframes and pixel-perfect assets, directly reducing revision cycles and rework

Retail Assistant / Visual Merchandiser | Primark | Jun 2021 - Sep 2025

- Managed floor-wide visual merchandising across 7+ seasonal campaigns per year, redesigning entire store layouts to maximise conversion at primary traffic points
- Tracked product performance using sales data to make real-time decisions on stock rotation, applying a data-driven iteration process directly comparable to UX A/B testing
